Subject: Crankcase and Cover change - 7PFR, 7PFR OEM and 8PFR Pumps

The crankcase and rear cover molds have been modified on the 7 frame plunger pumps. The new rear cover will have no o-ring groove, which will allow a better fit and easier servicing.

As a result of these changes, old crankcases and rear covers will be phased out and are not interchangeable with the new crankcase and rear cover. The old o-ring and screws will still be available to service your pump.

This change becomes effective with June 2008 production (6080101).

7 Frame OEM and Block-Style Pumps

(Models 51G1, 53, 55, 56, 56G1, 57, 58G1, 59G1**, 60G1**, 70*, 70G1*, 781*†, 781K*†)
